Features:

1. Text to Speech:-
   Users can upload their blog content and the site converts this in audio format to make it more comfortable to users who prefer listening to content.

2. Speech to Text:-
   Users can upload their podcast/audio content and the site converts this in blog format to make it more comfortable to users who prefer reading.

3. Blog recommender system - **(medium.com)**
   We can recommend the blog to any reader based on his/her review,rating and the tags of the blog.

4. Payment Gateway:
   For any money related transaction users can use the site's inbuilt payment gateway for example for sending donations to the author.

5. Email Subscription:
   Users can subscribe to a specific author through email and whenever that author posts then they will receive mail for the same.

6. Originality Check:
   With the help of a computer-aided plagiarism detector, we can determine the plagiarism level of two documents.

7. Insight/Analysis of Blogs:
   This will help to see where your audience is coming from and what they are interested in.

8. Variety of templates for blogs

9. Abusive Text/Speech classification:
   This feature will automatically moderate blogs or audio with bad language

10. Text feature extraction (Auto tagging articles):
    Using NLP we can extract the features of the blog and automatically tag the articles.This will help to recommend and search for the blogs.

11. Trending blogs: **blogger.com**
